Claims Attachment

19. (amended) A method as claimed in [claims13] claim13 wherein the receptor electrode is an iontophoresis electrode which includes an electrolyte-containing compartment for storage of electrolyte, an electroconductive member and a membrane through which electrolyte transport occurs.

25. (amended) A method according to claim 13 wherein said first electrode is a reservoir-type iontophoresis electrode holding a supply of the selected biologically active agent in a formulation suitable for iontophoretic or [phonophoreticdelivery] phonophoretic delivery and/or wherein said second electrode is a reservoir-type iontophoresis electrode holding a supply of electrolyte.

26. (amended) A method according to claim 13, wherein said first and second electrodes [comprises] comprise an electroconductive part having electroconductive material selected from the following group: stainless steel, gold, silver, titanium, copper, zinc, graphite and metal salts (e.g. silver chloride).

31. (amended) A method according to [claims13] claim13 wherein the catheter-based device can be removed entirely from the epidural space following positioning of the donor electrode.
